

VOLVO TRUCKS

A Way Forward to Green Recovery

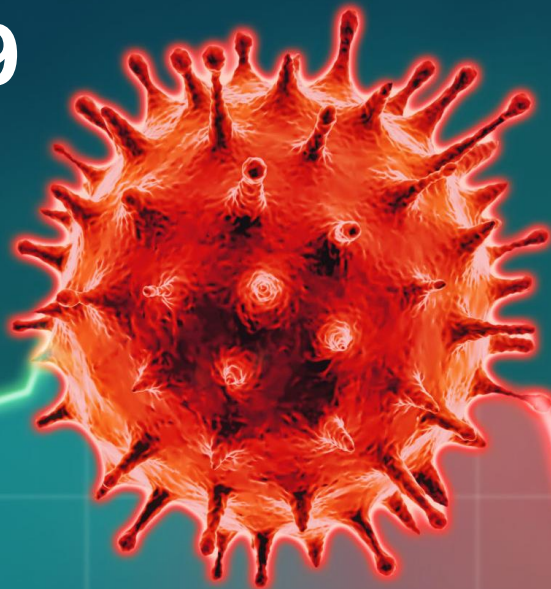

Quality, Safety and Environmental care

**Our vision: To become the world leader
in sustainable transport solutions**

COVID-19

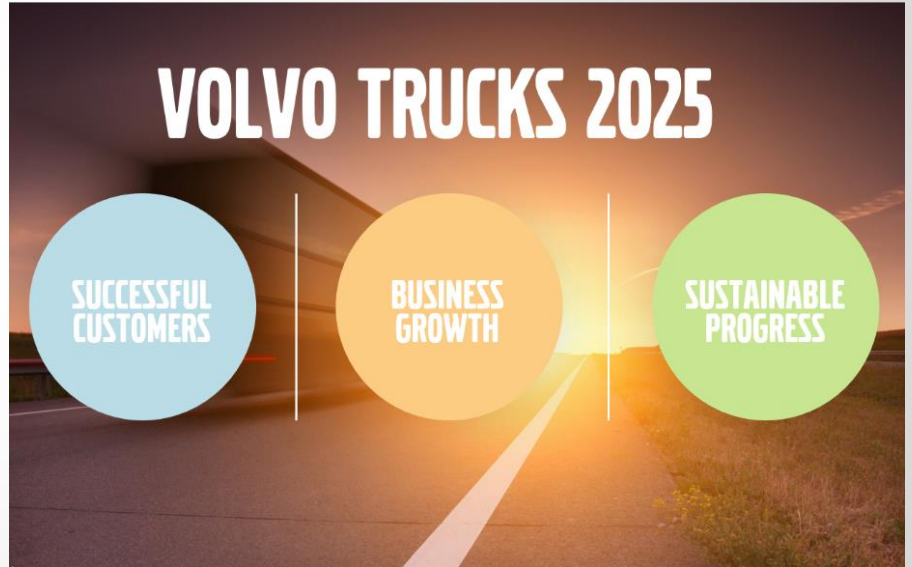

Global trends

- Dwindling resources and climate change
- More people, growing cities
- Transportation needs will rise dramatically
- Connected society

Our journey

- To both perform and transform
- To make Volvo Trucks and our customers successful we will continue invest in:
 - Sustainable technologies
 - Digital services
 - New business models

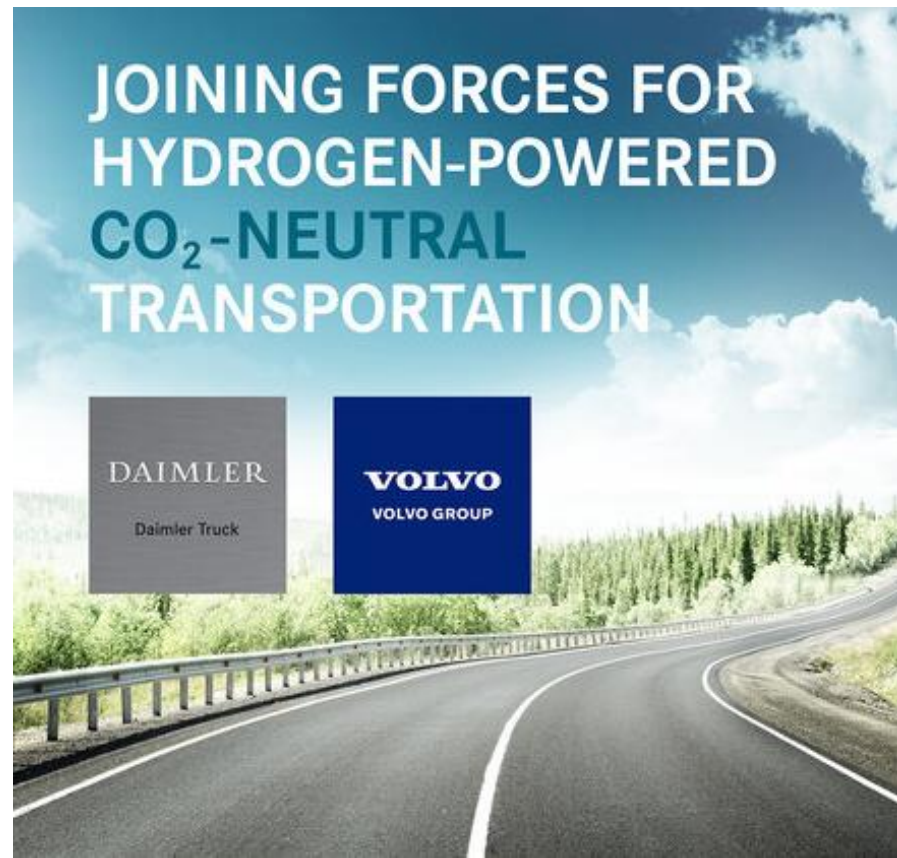

Environmental work never ends

- Diesel engine technology is our best option to date in terms of fuel efficiency
- Electromobility
- Connectivity
- CO₂ neutral operations
- Advanced our use alternative fuels

Together we're stronger

- 50/50 joint venture by Daimler Truck AG and the Volvo Group
- Development and large-scale production of fuel cells for applications in heavy-duty vehicles and other use cases.

**Our history of innovation drives us
into the future**
