

Software engineering and digital innovation

Our partners create change. We build the technology behind it.

NFQ Technologies

NFQ Technologies is an international software development company focusing on creating digital products and solutions for startup and corporate companies.

Company is a part of NFQ Group owned by shareholders in Germany and Lithuania. It has delivery offices in Lithuania and Germany for the European and American market and delivery offices in Vietnam and Singapore for Asian market.

Overview

NFQ Technologies accelerates the success of entrepreneurs with a current team of 300 specialists delivering company-building services including strategy, engineering, operational scaling, recruiting, business development, product delivery, and product marketing.

We truly believe that time to market is getting more and more important for companies that want to build a global and not "only" a national category winner. If you have a working and scaling business in your home-market speed is everything to fight international upcoming competition. We believe that by leveraging our excellent technology experience and European network we can give you the edge.

"After 10+ years within the online food business in Denmark we needed a full-blown update of our IT platform ensuring future growth and scalability, internationally. We partnered with NFQ and have been more than pleased with the effort and work they have put into the project. We have grown our orders with +50% from the previous year after launching the new system."

Thomas Cort Hansen

CEO of Takeout Group Ventures, Denmark

Since 2014, the world's largest search engine for vacation rentals relies on our help to develop its technology platform, capable to compare more than 18 million offers from more than 2,000 trusted partners, including Airbnb, Booking.com, Vrbo and TripAdvisor.

"We partnered with NFQ right from the beginning. NFQ was absolutely instrumental from the beginning on to scale HomeToGo up to the current level (world market leader for Vacation Rental metasearch). As just one example NFQ managed to bring on board 30 high-end developers in just 2 months to built our tech team. We would definitely do it again if we would be asked to choose again."

Dr. Patrick Andrae

CoFounder and CEO of HomeToGo, Germany

LEMONCAT is digitizing the catering industry with a SaaS platform and consumer marketplace. Our solutions have helped the company secure investments in the tens of millions and launches in 400+ cities while connecting more than 500 catering suppliers within 2 years.

NFQ software engineers have developed the VillagePod mobile payments app for Ireland which managed to take the position of market pioneer and leader and to contribute already at an early stage to Open Banking and the 3DS2 credit initiative in the country.

Industries

Industry experience

NFQ Technologies strong advantage comes from the built practice of working with a broad range of industries globally.

A substantial track record has been acquired working with early-stage startups helping them realize their potential through rational product scoping, high-quality delivery and strategic advice.

We work with travel, contemporary retail, sharing economy, fintech, energy companies and help them create digital solutions tailored to a specific market and customer needs.

Not limiting ourselves to mentioned industries, NFQ Technologies can develop digital projects in many more industries that can benefit from digital opportunities.
